

CURAÇAO DOLPHIN THERAPY & RESEARCH CENTER

"We are here to make the difference"

Curaçao was selected as CDTC's location for its unique combination of climate, natural open water environment for our dolphins, high medical standards and good international flights connections.

If you think this therapy is interesting for you or someone who is important to you, please contact us.

‘Dolphin Assisted Therapy gave us everything we hoped for’

If you seek to find a tailor-made, intensive rehabilitation, where the definition of strength is more important than underlining deficits, if you are looking for an environment where joy is a key factor for success in professional rehabilitation and caring warmth underlines the philosophy to do the utmost to build self-confidence for every patient.

We are here to make the difference... for you!

THE THERAPY

CDTC's unique therapy concept reflects the latest research and focuses on an outcome-oriented rehabilitation applied according to the individual needs of each patient.

THE TEAM

Our team is formed by international experts from all fields of rehabilitation and CDTC's dolphins, who were specially chosen for their unique characteristics. Together they work to set standards in therapy.

THE RESULTS

Dolphin Assisted Therapy at CDTC has been carried out measurably successful for thousands of patients with CP, Down Syndrome, autism and a vast range of other syndromes amongst them ADHD and developmental disorders. It has also been successfully applied for patients with Cancer and PTSD.
